## The User-Friendly Package Arrives at Your Site Ready to Set Up and Treat Seed

## Available in a Variety of Models

- LP800 (800 bushel per hour)
- LP2000 (1800 bushel per hour)
- ST800 (800 bushel per hour)
- ST2000 (1800 bushel per hour)

### LP Specifications

#### 340 oz. Calibration Tube

- Now calibration is an easy, user friendly process
- Ensure you are accurately applying your treatment to save cost

#### Offers One-Man Operation

- Our proximity switches give automatic pump and inlet conveyor shut off

#### Standard 27 Gallon Stainless Steel Mix Tank

- Easy clean up
- Corrosive resistant
- Keeps your chemical in suspension state

#### Peristaltic Pump

- Applies chemical treatment
- Easier to calibrate
- Less chance of clogging
- More accurate and less maintenance

#### Electrically Driven Rotary Atomizer

- Allows you to coat your seed with unbeatable results

#### Chemical

- As seed falls through the atomizer chamber it is totally enveloped by the chemical
- Chemical is released through the atomizer that is spinning at 1750 RPM

#### Single Phase Electrical Panel

- 230 volt that includes all motor controls

#### From the Atomizer to the Rotary Drum

- A 5'6" rotary drum assures a final phase of accurate mixing and coating

#### Self Emptying Capability

- Offers easy clean-up and fast changeover

#### Cleated Belt Conveyor Moves Seed Without Damage

- Complete with hinged clean-out, belt adjustments, and enclosed frame

#### Optional Features Include

- Outlet conveyor controls
- Inoculant kit (additional pump, plumbing, and 5 gallon poly tank)
- Seedwheel (for seed calibration)
- Flowmeter (for chemical calibrating and monitoring)
- Gooseneck or bumper hitch trailers

### ST Specifications

#### Simple Yet Effective Seed Calibration

- Adjustable seed flow gate

#### Chemical Rate Adjustment

- With varying spray nozzles and pressure gauge

#### Start with Seed Entering the Surge Hopper

- From the surge hopper the seed falls into the treating chamber where through a spray tip application system, the chemical is applied to the seed

#### Complete with Proximity Switch

- Gives automatic shutoff of your chemical pump

#### 35 Gallon Poly Chemical Tank on Both Units

- Diaphragm pump for chemical application
- Additional diaphragm pump for chemical recirculation

#### Features include:

- 5' rotary drum on ST800, 6' rotary drum on ST2000

#### Optional Features Include:

- Inoculant kit (additional pump, plumbing, and 5 gallon poly tank)
- Seedwheel (for seed calibration)
- Flowmeter (for chemical calibrating and monitoring)
