

SC Series Seed Treaters

Treating seed is simple.

The SC units can be connected to an existing auger where the treatment is applied to the seed and mixed in the auger.

Affordable on-the-farm line of treaters.

The SC series of treaters have many functions. They can be used as an additional mix tank and pump for an existing treater or as an inoculant applicator.

Save Time, Labor and Cash with the SC Series of Seed Treaters

The High-Quality, User-Friendly SC Series is Available in Stainless or Poly Versions

Available in a Variety of Models

- SC Stainless in 27 and 50 gallon sizes
- SC Poly in 2.5, 15 and 40 gallon sizes

SC Specifications

Stainless Versions of the SC

- Available in 27 and 50 gallon sizes
- Include the stainless steel mix tank, control panel, 340 oz. calibration tube, and a peristaltic pump - all on a stand with fork lift pockets for easy mobility
- Calibration tube, along with the peristaltic pump provides easy and accurate settings of chemical rates
- Chemical flow rates are controlled with a dial adjustment on the control panel

Poly Versions of the SC

- Available in 2.5, 15 and 40 gallon units
- The 15, 40 and 60 gallon versions include a poly chemical tank with control panel, recirculation and diaphragm pumps, all on a portable cart
- The 2.5 gallon unit is designed to hold your chemical container, and then apply it using a diaphragm pump
- Chemical flow rates for the poly unit are controlled with ball metering valves

Features Include:

- 120 volt power available for all stainless steel and 15 and 40 gallon poly units.
- 12 volt power available for 2.5 and 15 poly
